

Don't know your finger measurement?

Measuring your finger for ring size is easy. If you already have a ring that fits just right, just measure the space from one interior side to the other interior side (the diameter). This will give you your ring measurement.

Circles in US ring size and diameters.

Important! When you print the document, make sure you specify actual size in the print instructions so that the measuring tools print out accurately. To verify make sure the 1 inch or 25mm bars match exactly.
